## Wildlife Recovery and Rescue

### Zoos Victoria's contribution to recovery programs

As part of our Fighting Extinction commitment, Zoos Victoria participates in a number of government-agency managed Recovery Programs for threatened species. Despite the pressures of COVID-19, during the past twelve months a number of animals were released into protected habitat to help re-establish and bolster wild populations.

### Zoos Victoria's contribution to wildlife rescue and rehabilitation

Every year hundreds of injured and orphaned wildlife are brought to Zoos Victoria for assessment, treatment and care. Many of these cases involve trauma, such as car accidents or attack by cats and dogs, resulting in fatal injuries. These cases may require euthanasia. Some cases may require rest and can be released within 24 hours of arrival. Some cases have minor injuries, and can be transferred to registered wildlife shelter operators having the appropriate expertise for further care. ZV veterinary staff will continue to monitor the health of cases transferred to wildlife carers. During 2020/21:

- Melbourne Zoo, received 845 wildlife admissions, of which 215 were successfully treated and returned to the wild, whilst 139 were transferred out to registered wildlife carers for further care and release
- Healesville Sanctuary, received 1992 animals, of which 308 were successfully treated and returned to the wild, whilst 606 were transferred out to either registered wildlife carers for further care and release or other government organisations
- Werribee Open Range Zoo, received 683 animals, of which 65 were successfully treated and returned to the wild, whilst 162 were transferred out to registered wildlife carers for further care and release
