WHO’S WHO IN YOUR ZOO?

Exploring animal behaviours that reflect human traits in the workplace can be a valuable team and self awareness experience.

This workshop provides participants with the opportunity to connect with wildlife and to gain an understanding of animal, including human, behaviour.

You may just observe some of these behaviours in your team.

OBJECTIVES

For participants to:
- Participate in a shared team experience
- Gain a better understanding of their team through reflections prompted by animal profiles.
- Respect the strengths of individuals and understand how these differences can, and do, enhance the effectiveness of a team.
- Gain a deeper understanding of animal behaviour in the wild and how this may relate to the human world of work.
- Explore and reflect on the role of animals in the wild and how our actions can make a difference to their survival.

VENUE
Melbourne Zoo
Elliott Avenue, Parkville

DURATION
90 minutes
